Art Unit: 1723

1. The disclosure is objected to because of the following informalities: On line 6 of page 1 of the specification, application no. 10/084,605 needs to be updated to be US Patent No. 6,688,476. On line 19 of page 1 of the specification, “(Now abandoned,” should be corrected to “(Now abandoned),”.

Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1723

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 3 of U.S. Patent No. 6,688,476. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 3 of U.S. Patent No. 6,688,476 fully suggests the structural elements in the method of claim 1 of the instant application and the method of claim 1 of the instant application is inherent step in making the apparatus of claims 1 and 3 of U.S. Patent No. 6,688,476.

4. Claim 2 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 3 of U.S. Patent No. 6,688,476 in view of US Pat. No. 5,591,337. Claim 2 essentially differs from the method of US Pat. No. 6,688,476 in reciting that flexible thermoplastic material includes polyvinyl chloride. US Pat. No. 5,591,337 teaches that filter device housing is made of flexible thermoplastic material comprising polyvinyl chloride material (see col. 8, lines 58-61). It would have been obvious to use known flexible thermoplastic material such as polyvinyl chloride in making the blood filter of US Pat. No. 6,688,476 as suggested by US Pat. No. 5,591,337.
